EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Lawrence Ashery on September 14, 2006. The application has been amended as follows:

- Replace claim 13 with the following version:

13. The optical communications module as defined in Claim 1, wherein said step of said cavity includes a first step and a second step which is below said first step, at least one of said first optical transmission line and said second optical transmission line is disposed on said first step, and said optical component is disposed on said second step.

- Replace claim 25 with the following version:

25. The substrate as defined in Claim 23, wherein said step of said cavity includes a first step and a second step which is below said first step, at least one of said first optical transmission line and said second optical transmission line is disposed on said first step, and said optical component is disposed on said second step.

Art Unit: 2874

The above amendment removes the phrase "is provided in a plurality and" from each of claims 13 and 25 for improved clarity. The amendment to claim 25 also removes the phrase "one level" from the original version of that claim, to merely clarify that it is possible for another step to be located between the first and second steps (as dependent claims 28 and 31 further specify). It is noted that a similar change was made to claim 13 by the amendment received June 15, 2006.

Allowable Subject Matter

Claims 1 and 3-31 are allowed. Independent claims 1 and 23 as amended clearly distinguish over the previously applied references and the other prior art of record. Claims 3-22 or 24-31 depend from claims 1 or 23 respectively.
